## Web Content Display (Configuration2)

In the new portal clicking the “Configuration2” option or trying to select a web content (to be displayed via web content display portlet) displays the page with a list of available web content articles as a pop up. Navigate back to the portlet by clicking the “x”. The page title shall display “Web Content Display-Configuration2” or based on any title created by user the page shall display “TitleName-Configuration2”.

## Removal of Personal Folder

Personal folder has been removed in the new portal from the list of folders displayed under “Resource Type -> Document” via WYSIWIG editor, since any document uploaded to the editor’s personal folder cannot be linked to any page. (Ignoring this folder was not intuitive for the editors.)

Personal Folder displayed in the Old Portal:

Personal Folder has been removed from the New Portal

## Structure and Template

A Structure creates a structure editor for content creators that includes “Form Controls”;

A template is created to display that content in a consistent repeatable manner

Structure Editor easily adds and removes fields you want to make available to content creators and then dynamically move them around. This editor includes an entire suite of Form Controls that can be dragged and dropped onto the structure.

Existence of a structure shall provide a drop down with the available list of structures while adding web content. This feature shall enable adding web content based on a particular available structure.

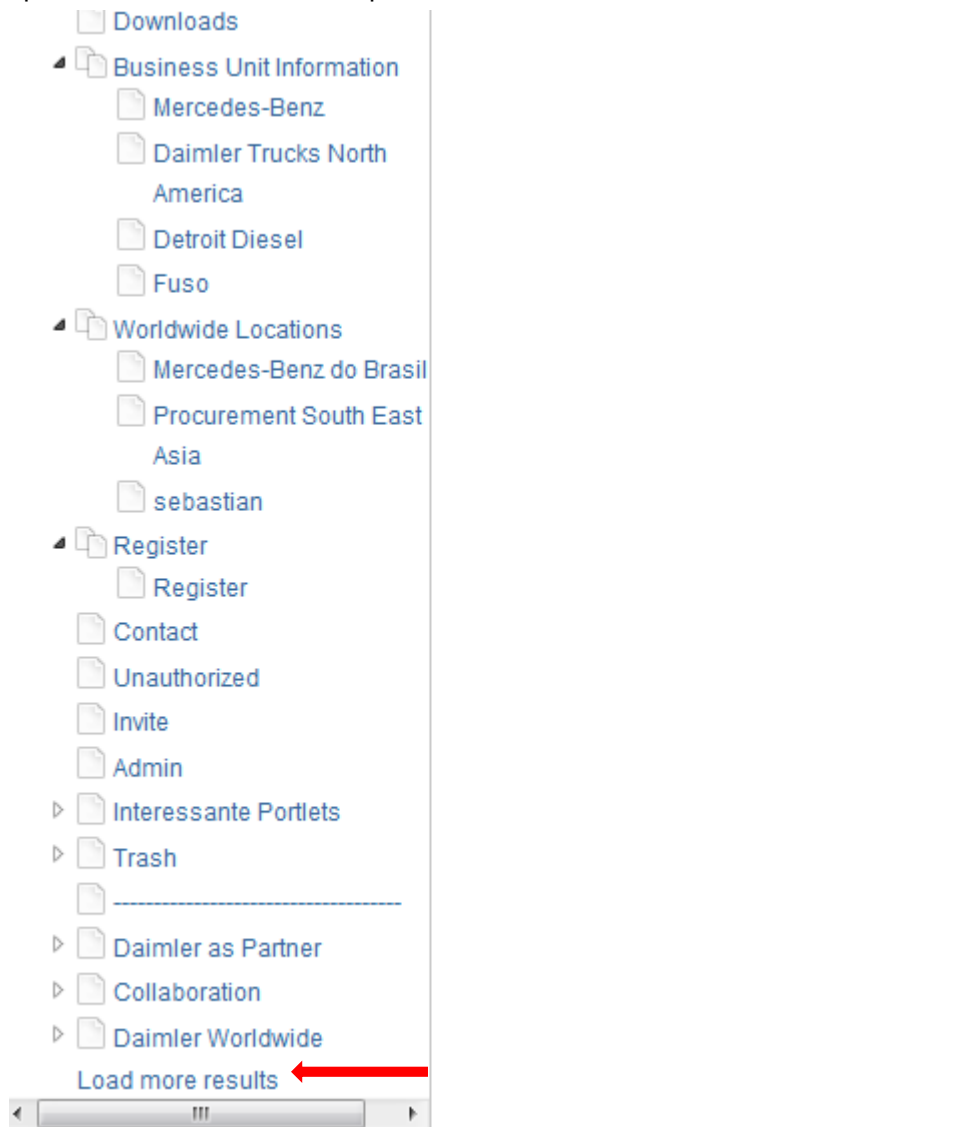

The screenshot displays the 'Web Content' management interface. At the top, there are tabs for 'Web Content', 'Structures', 'Templates', 'Feeds', and 'Recent'. Below the tabs, there is a search section with a 'Match' dropdown set to 'All' and a text input field. Below the search section, there are two rows of form controls: 'ID', 'Title', and 'Description' in the first row; 'Content', 'Type', and 'Status' in the second row. A 'Search' button is located below the form controls. A red arrow points to the 'Add' button, which has opened a dropdown menu. The dropdown menu contains four options: 'Basic Web Content', 'CovisintSite-Structure', 'Default', and 'GlobalWebContentStructure1 (Global)'. To the right of the dropdown menu, there is a 'Permissions' tab and a 'Subscribe' button. Below the dropdown menu, there is a table with columns: 'ID', 'Title', 'Status', 'Modified Date', 'Display Date', and 'Author'. The table contains six rows of data. At the bottom right of the table, there are pagination controls: 'Items per Page' (set to 20), 'Page' (set to 1 of 4), and navigation links for 'First', 'Previous', 'Next', and 'Last'.

ID	Title	Status	Modified Date	Display Date	Author
14081	File 1	Approved	6/19/12 4:33 PM	6/19/12 4:28 PM	Portal Admin
14090	File-1	Expired	11/12/12 6:09 PM	6/19/12 4:28 PM	Portal Admin
23880	File 3	Approved	6/20/12 11:36 AM	6/20/12 11:33 AM	Portal Admin
23898	File 5	Approved	6/20/12 11:36 AM	6/20/12 11:33 AM	Portal Admin
23925	File 8	Approved	6/20/12 11:37 AM	6/20/12 11:33 AM	Portal Admin
23952	File 11	Approved	6/20/12 11:37 AM	6/20/12 11:33 AM	Portal Admin

Please contact your Covisint Client Manager to add a structure and template.

## Load More Results Option

Load More Results link displays all the pages (which may not be displayed unless there is a long list of pages in the menu) when navigating to “Manage Pages” by selecting the “Manage Pages” option from the “Welcome” dropdown.

# Documents and Media

## Document History

The current document is displayed as part of the document's history. The document history also displays who uploaded the document.

## Static Link

Document and Media supports static URLs. If a file is moved from one folder to another folder, the old URL can still be used to download the document though with the moving of the document to another folder, a new URL shall be created. The user shall be able to download the document via the new URL as well as the old. Although, while moving a file from one folder to another the old URL is replaced with a new, it remains unchanged if they exist as part of an already published web content, existing documents or any email previously sent out with it.
